# LiNQ ONE ZERO

by NuvoLinQ

A world class e-UICC SIM and Platform providing unrivalled scalability, simplicity, and security.

1 SIM, **Zero** Touch

2FF Mini SIM

3FF Micro SIM

4FF Nano SIM

One SKU + Zero Touch to deliver Secure & High Availability

CONNECTIVITY service enabled by iUICC

eSIM

MFF2 6x5mm

QFN6 3x2mm WLSCP 2.7x2.5mm

iSIM

No external component. Ex. Sequans Monarch 2 LTE-M/NB-IoT modem already integrates an iUICC

Always On

- SIM preloaded with Global Bootstrap profile

- Device deployed triggers over-the-air programming with preferred MNO parameters

- Zero-touch activation in line with GSMA RSP M2M specifications

- Bootstrap profile converts to a failover profile for business continuity

- MNO connections exclusively with Tier 1 carriers, provisioned as Static IP

Reduced Sized Footprint

Bigger isn't always better, an eSIM can be up to 98% smaller than a standard SIM today which opens up a world of possibilities for your IoT device design.

Optimise internal space with all that extra room or manufacture devices that are more streamlined and compact.

Low Power, High Performance

The eSIM comes with minimal power requirements attached. It draws power from the system on the chip (SoC) and leaves you with more energy to divert into improving performance. Get ready for 10-15 years of battery life in some cases. And expect enhanced connectivity, at speed.

This is IoT connectivity for the long run.
